

Qatar National Bank (Q.P.S.C.) - India Branch
(Incorporated in Qatar with Limited Liability)

Disclosures under Pillar 3 of capital adequacy framework (Basel III guidelines) for the quarter ended 31 December 2025.

The Basel III disclosures contained herein relate to the Indian branch of Qatar National Bank (Q.P.S.C.) ("the Bank") for the period ended December 31, 2025. These are primarily in the context of the disclosure requirements under Annexure 18-Pillar 3 disclosure requirements of the Reserve Bank of India (RBI) Master Circular - Basel III capital regulation dated July 01, 2015. The Bank has implemented the requirement laid down by RBI for Pillar 3 disclosure, covering both the quantitative and qualitative items. The information provided has been reviewed by senior management. All table DF references relate to those mentioned in Annexure 18 - Pillar 3 of the above-mentioned circular.

The Basel III framework consists of three-mutually reinforcing pillars:

- (i) Pillar 1: Minimum capital requirements for credit risk, market risk and operational risk
- (ii) Pillar 2: Supervisory review of capital adequacy
- (iii) Pillar 3: Market discipline

Market discipline (Pillar 3) comprises a set of disclosures on the Capital Adequacy and Risk Management framework of the Bank. Pillar 3 disclosures as per RBI master circular on Basel-III Capital Regulations are set out in the following sections for information.

1) Scope of Application and Capital Adequacy (DF-1)

The Bank has implemented the requirement laid down by RBI for Pillar 3 disclosure, covering both the quantitative and qualitative items.

The Bank does not have any subsidiary in India which requires to be consolidated in line with AS21 (Consolidated Financial Statements).

2) Capital Adequacy (DF-2)

Qualitative Disclosures

The Bank's capital management approach is to ensure that it maintains a strong capital base to support its business growth and to meet regulatory capital requirements at all times.

The Capital Adequacy Ratio (CAR Ratio) of the Bank is **26.95%** higher than minimum regulatory CRAR requirement of 11.50%.

The Bank assesses its growth opportunities relative to the capital available to support them, particularly in the light of the economic environment and capital requirements under Basel III. The Bank maintains a strong discipline over capital allocation and ensures returns on investment cover capital costs.

A summary of the Bank's capital requirement for credit, market and operational risk and capital adequacy ratio as on December 31, 2025 is presented below:

(Rs. in '000s)	
Quantitative disclosures	as at 31 Dec 2025
Capital requirements for credit risk (I):	3,606,286
Portfolios subject to standardised approach	3,606,286
Securitisation exposures	0
Capital requirements for market risk (II):	54,857
Standardised duration approach;	54,857
Interest rate risk	46,535
Foreign exchange risk (including gold)	8,322

Qatar National Bank (Q.P.S.C.) - India Branch
(Incorporated in Qatar with Limited Liability)

Quantitative disclosures	as at 31 Dec 2025
Equity risk	0
Capital requirements for operational risk (III):	111,509
Basic Indicator Approach	111,509
The Standardised Approach (if applicable)	0
Total capital requirement (I + II + III)	3,772,652
Total capital funds of the Bank (Tier I + Tier II)	8,841,067
Total risk weighted assets	32,805,666
Common Equity Tier I Capital (CET1)	8,625,172
Tier I Capital ratio	26.29%
Tier II Capital ratio	0.66%
Total Capital ratio	26.95%

3) General Qualitative Disclosures:

As part of overall corporate governance, the Bank has set up a framework which defines approval authority levels, policy structures and risk appetite limits to manage the credit risks.

Credit Risk [table DF 3]

Credit risk is the risk of loss arising out of failure of counterparties to meet their financial or contractual obligations when due. The credit risk that the Bank faces arise mainly from corporate advances, exposure to debt securities, settlement balances with market counterparties and available for sale assets.

Credit risk is managed in accordance with the Bank's comprehensive risk management control framework set out in the QNB Group's - Wholesale and Institutional Banking Credit Policy. Local policy is an addendum to the Group's policy adjusted to align with RBI lending guidelines. The RBI guidelines is complied with by the Bank at all times, however where there is a conflict between RBI guideline and the Bank's credit Policy then the more conservative policy is followed.

Credit Risk Rating

The Bank's Group Credit Committee (GCC) has approved the internal credit risk rating policy for corporate customers, establishing a rating mechanism for identifying and assessing the credit risk against each obligor or transaction. The mechanism considers factors such as management, financial position, macro or micro economic factors and the facility structuring.

The system plays a vital role in the decision making, monitoring and capital adequacy assessment processes relating to credit risk management. QNB India is now utilizing the Bank's MRA system to rate customers.

Credit Risk Mitigation

A sound credit risk mitigation framework is in place in the Bank. The principles for credit risk mitigation have been integrated in the Bank's Wholesale and Institutional Banking Credit Risk Management Policy, risk limits for counterparties, obligors and Bank of obligors and industrial segments, early warning signals, credit administration, collateral and remedial management procedures.

Credit Reporting

An effective early warning system is in place which enables the business units, credit managers and credit administration personnel to identify and report problem loans on a prompt basis. Reports are received from business units on a regular basis, which are escalated to senior credit authorities for taking necessary action.

Credit Risk: Disclosures for Portfolios subject to Standardised Approach: DF-4

External Ratings

The Bank has adopted the standardized approach of the new capital adequacy framework for computation of capital for credit risk. The Bank has assigned risk weights to different classes of assets as prescribed by RBI.

As at December 31, 2025, the Bank has not considered external rating of claims of any Borrower counterparty.

(Rs. in 000s)

Quantitative disclosures	Amount
a) For exposure amounts after risk mitigation subject to the standardised approach, amount of a Bank's outstanding (rated and unrated) in the following three major risk buckets as well as those that are deducted:	
• Below 100% risk weight	22,406,430
• 100% risk weight	1,519,886
• More than 100% risk weight	15,316,683
• Deducted	-

Qatar National Bank (Q.P.S.C.) - India Branch
(Incorporated in Qatar with Limited Liability)

Credit Risk Mitigation: Disclosures for Standardised Approaches: DF-5

Taking collateral enables the Bank to manage and mitigate its credit exposure to a counterparty. Collateral refers to assets in which the Bank has legally enforceable right in order to mitigate losses in case of a default.

The comprehensive assessment of collateral is performed in which certain qualitative & quantitative factors are considered, including:

- Nature;
- Quality;
- Liquidity;
- Market value;
- Exposure of collateral to other risks such as market risk and operational risk;
- Quality of charge;
- Legal status of rights;
- Legal enforceability; and
- Time required to dispose of.

As at Dec 31, 2025 the Bank has collateral eligible as credit risk mitigant.

(Rs. in 000s)

Quantitative disclosures	Amount
a) For each separately disclosed credit risk portfolio the total exposure (after, where applicable, on or off-balance sheet netting) that is covered by eligible financial collateral after the application of haircuts	905,370
b) For each separately disclosed portfolio the total exposure (after, where applicable, on-or off-balance sheet netting) that is covered by guarantees/credit derivatives (whenever specifically permitted by RBI)	-

Securitisation Exposures: Disclosure for Standardised Approach: DF-6

The Bank does not have any securitization exposure.

Market Risk in Trading Book: DF-7

Qualitative Disclosures

Market risk is the risk that changes in financial market prices, interest rates, exchange rates, market volatilities and correlations will adversely impact the financial condition of the Bank. Market risk consists of traded market risk and Banking book interest rate risk.

- Interest rate risk is the exposure of the Bank's financial condition to adverse movements in interest rates.
- Foreign exchange risk is the exposure of the Bank's financial condition to adverse movements in foreign exchange rates.
- Fixed income trading risk is the exposure of the Bank's financial condition to adverse movement in bond prices.

The following portfolios are covered for measuring market risk:

1. Securities held under Available for Sale (AFS) category; and
2. Foreign exchange spot trading.

The Bank's market risk management philosophy is to ensure that risks are identified, measured, monitored and reported on a timely basis and in a professional manner.

The Group Risk Committee (GRC) defines limits in terms of FX positions, interest rate positions, VaR and stop loss. The Bank's appetite for market risk is low and its minimal tolerance for market risk is reflected in the conservative market risk limits approved by the Board.

The Board of Directors (HO-Doha) review and approve market risk policies and limits annually. The Group's Asset Liability Committee (GALCO) reviews and recommends strategy, policies and procedures relating to Asset

Qatar National Bank (Q.P.S.C.) - India Branch
(Incorporated in Qatar with Limited Liability)

Liability Management across the Group to the Executive Committee and the Board of Directors, including Group reporting as and when required.

Strategic Risk Management (SRM) facilitates the following for all the international branches including India:

1. Determining appropriate risk limits and obtain GRC approval of these limits;
2. Ensuring both the proper implementation of the market risk policies approved by Board and/or ALCO/GRC especially the risk identification, measurement and reporting policies and processes;
3. Monitoring and reporting the market risk positions and limit compliance to GRC and ALCO. Limit breach escalation;
4. Recommending market risk management strategies to ALCO; and
5. Ensuring compliance with the regulatory guidelines relating to market risk management.

Local ALCO meets on a monthly basis to review the liquidity, interest rate risk, asset/liability position, FX position, NFSR, VAR, stress testing etc. Group Treasury and SRM have oversight on the local ALCO.

Quantitative Disclosures

The Bank is following the standardized duration approach for calculating capital requirements for market risk. The Bank in India currently does not have any exposure to capital markets.

(Rs. in 000s)

Capital requirement for market risk	As at 31 Dec 2025	As at 30 Sep 2025
Standardized approach	54,857	53,355
☐ Interest rate risk	46,535	45,034
☐ Foreign exchange risk (including Gold)	8,321	8,321
☐ Equity risk	Nil	Nil

Operational Risk: DF-8

Qualitative Disclosures

Operational risk is the risk of direct or indirect loss resulting from inadequate or failed internal processes, people, systems, control or external events. Internal and External Fraud, IT failure, Cyber-attacks, regulatory, information security, staff errors, and business Continuity risks would be typical sources of operational risk for QNB India.

QNB India utilises three key tools for identifying, managing and monitoring operational risks namely:

1. Incident reporting;
2. Risk and Control Self-Assessment (RCSA) whereby each business unit identifies, assesses and designs controls against potential or existing operational risks; and
3. Key Risk Indicators which are pre-set to help monitor status of operational risks.

The Bank's approach to operational risk is to contain risks within the Bank's risk appetite boundaries. As part of building a risk culture, all Bank staff are regularly required to undergo various training & awareness programs on Operational Risk Management & Compliance through workshops and online e-learning modules supported by the head office.

Approach for Operational risk Capital Assessment

As per RBI guidelines, the Bank has adopted Basic Indicator Approach (BIA) for assessing capital for operational risk. As per BIA, the capital requirement as at December 31, 2025 is INR 111,509 (000s)

Interest Rate Risk in the Banking Book (IRRBB): DF-9

Qualitative Disclosures

Interest rate risk refers to the potential for the Bank's earnings or capital being reduced due to fluctuations in interest rates. The main source of the interest rate risk in the banking book is the re-pricing risk, which reflects the fact that the QNB India's interest rates for its assets and liabilities are of different repricing maturities and are priced at different interest rates.

Qatar National Bank (Q.P.S.C.) - India Branch
(Incorporated in Qatar with Limited Liability)

The Bank manages its banking book interest rate risk by limiting the use of fixed rate assets, and by generating fixed rate term liabilities where possible. The Bank controls the amount of risk it is prepared to accept by the use of defined limits for interest rate risk in the Banking book. The limits are approved by the Board annually, or more frequently if appropriate, and limit compliance and risk exposures are reported monthly and communicated to India ALCO.

Quantitative Disclosures

The Bank identifies and assesses interest rate risk in the Banking book exposures via interest rate sensitivity analysis. This analysis is included in the monthly report to Group Strategic Risk Management.

The potential change in Market Value of Equity (MVE) and Earnings at Risk (EaR) for different interest rate shocks as on December 31, 2025 is given below:

Rs. in 000s	MVE		EaR	
Interest Rate Shock	Increase	Decrease	Increase	Decrease
250 bps change in interest rates	70,590	-70,590	232,130	-232,130
300 bps change in interest rates	141,180	-141,180	278,556	-278,556
400 bps change in interest rates	188,240	-188,240	371,408	-371,408

General Disclosure for Exposures Related to Counterparty Credit Risk: DF 10

Qualitative disclosures

As per the Master Circular - Prudential Guidelines on Capital Adequacy and Market Discipline - New Capital Adequacy Framework (NCAF) of RBI dated Jul 31, 2015, Banks are expected to use the standardised method for computation of counterparty credit exposure using the Current Exposure Method (CEM) for market related off balance sheet exposures. The Bank has not carried out any derivative transactions during the year, also there were no derivative contract outstanding as of December 31, 2025 which required any capital allocation

DF-17: Summary Comparison of accounting assets and leverage ratio exposure

(Rs.in 000s)

Sr. No.	Particulars	Amount
1	Total consolidated assets as per published financial statements	45,554,672
2	Adjustment for investments in Banking, financial, insurance or commercial entities that are consolidated for accounting purposes but outside the scope of regulatory consolidation	-
3	Adjustment for fiduciary assets recognised on the balance sheet pursuant to the operative accounting framework but excluded from the leverage ratio exposure measure	-
4	Adjustments for derivative financial instruments	-
5	Adjustment for securities financing transactions (i.e. repos and similar secured lending)	-
6	Adjustment for off-balance sheet items (i.e. conversion to credit equivalent amounts of OBS exposures)	6,450,113
7	Other adjustments	-
8	Leverage ratio exposure	52,004,785

DF-18: Leverage ratio common disclosure template

(Rs.in 000s)

Sr. No.	Leverage ratio framework	Amount
On-Balance sheet exposure		
1	On-balance sheet items (excluding derivatives and SFTs, but including collateral)	45,554,672
2	(Asset amounts deducted in determining Basel III Tier 1 capital)	-
3	Total on-balance sheet exposures (excluding derivatives and SFTs) (sum of lines 1and2)	45,554,672
Derivative exposure		
4	Replacement cost associated with all derivatives transactions (i.e. net of eligible cash variation margin)	-
5	Add-on amounts for PFE associated with all derivatives transactions	-
6	Gross-up for derivatives collateral provided where deducted from the balance sheet assets pursuant to the operative accounting framework	-
7	(Deductions of receivables assets for cash variation margin provided in derivatives transactions)	-
8	(Exempted CCP leg of client-cleared trade exposures)	-
9	Adjusted effective notional amount of written credit derivatives	-
10	(Adjusted effective notional offsets and add-on deductions for written credit derivatives)	-
11	Total derivative exposures (sum of lines 4 to 10)	-
Securities financing transaction exposures		
12	Gross SFT assets (with no recognition of netting), after adjusting for sale accounting transactions	-
13	(Netted amounts of cash payables and cash receivables of gross SFT assets)	-
14	CCR exposure for SFT assets	-
15	Agent transaction exposures	-
16	Total securities financing transaction exposures (sum of lines 12 to 15)	-
Other off-balance sheet exposures		
17	Off-balance sheet exposure at gross notional amount	6,450,113
18	(Adjustments for conversion to credit equivalent amounts)	-
19	Off-balance sheet items (sum of lines 17 and 18)	6,450,113
Capital and total exposures		
20	Tier 1 capital	8,625,172
21	Total exposures (sum of lines 3, 11, 16 and 19)	52,004,785
Leverage ratio		
22	Basel III leverage ratio	16.59%

23	Liquidity Coverage Ratio (%)		277.71%

Qualitative disclosure on Liquidity Coverage Ratio

The Bank measures and monitors LCR in line with RBI's circular dated 9 June 2014 on "Basel III Framework on Liquidity Standards - Liquidity Coverage Ratio (LCR), Liquidity Risk Monitoring Tools and LCR Disclosure Standards", as amended. LCR guidelines aims to ensure that a bank maintains an adequate level of unencumbered High Quality Liquid Assets (HQLAs) that can be converted into cash to meet its liquidity needs for a 30 calendar day time horizon under a significantly severe liquidity stress scenario. At a minimum, the stock of liquid assets should enable a bank to survive until day 30 of the stress scenario, by which time it is assumed that appropriate corrective actions can be taken.

The Banks LCR comes to **278.14%** based on daily average of three months (Q2 FY25-26) and is above the minimum regulatory requirement of 100%. Average HQLA during the quarter was Rs. 11,583,875 (000s) which was held 100% in the form of Level 1 assets. Quarterly LCR reported in the table above is calculated on a simple average of daily LCR position.

Qatar National Bank (Q.P.S.C.) - India Branch
(Incorporated in Qatar with Limited Liability)

The Bank has been maintaining HQLA primarily in the form of SLR investments over and above mandatory requirement and regulatory dispensation allowed on NDTL. SLR investments of the Bank considered for HQLA consists of Treasury Bills which provides timely liquidity to the Branch. The Branch does not hold any Level 2A or Level 2B Assets. The Bank has been maintaining high LCR primarily due to higher HQLA in the form of SLR investment over and above regulatory requirements. Outflows majorly comprise of Term Deposits and Interbank Borrowing. The Bank's major source of funding apart from Capital are term deposit and interbank borrowing. Term deposits are primarily from corporates and for borrowing the bank has resorted to the Interbank Money Market.

In line with the RBI guidelines, committed undrawn limits, if any, have been considered for calculation of outflows. Inflows consist of Loans and Interbank placements in the Money Market.

The Bank has not entered into any derivative contracts since inception.

The Bank has only one branch in India and all liquidity requirements are monitored on a real time basis.

The Bank does not have any currency mismatch in the LCR.

Overall liquidity management including LCR of the Bank is guided by Asset Liability Committee ('ALCO') which also strategizes the balance sheet profile of the Bank. There is no other material inflow or outflow not captured in the LCR common template. In addition to daily / monthly LCR reporting, Bank also prepares Structural Liquidity statements to assess the liquidity needs of the bank on an ongoing basis

(Incorporated in Qatar with Limited Liability)

Net Stable Funding Ratio (NSFR)

- Net Stable Funding Ratio (NSFR) guidelines ensure reduction in funding risk over a longer time horizon by requiring banks to fund their activities with sufficiently stable sources of funding in order to mitigate the risk of future funding stress. The NSFR is defined as the amount of Available Stable Funding relative to the amount of Required Stable Funding
- $NSFR = \text{Available Stable Funding (ASF)} / \text{Required Stable Funding (RSF)} \geq 100\%$

Net Stable Funding Ratio (NSFR)

(Rs. in 000s)

Qualitative disclosure around NSFR

The Banks NSFR comes to 183.86% as at the year ended 31 December 2025 and is above the minimum regulatory requirement of 100% set out by RBI guidelines. The Available Stable Funding (ASF) of Rs. 24,496,378 (000s) against a RSF requirement of Rs. 13,323,507 (000s). ASF is defined as the portion of capital and liabilities expected to be reliable over the time horizon considered for the NSFR, which extends to one year. Overall liquidity management of the Bank is guided by Asset Liability Committee ('ALCO') which also strategizes the balance sheet profile of the Bank. In addition to monthly NSFR reporting, Bank also computes LCR and Structural Liquidity statements on a daily basis to assess the liquidity needs of the bank. Management is of the view that the Bank has sufficient liquidity cushion to meet its likely future commitments.
