Independent Limited Assurance Report to the Qatar National Bank (Q.P.S.C.)

We have been engaged by Qatar National Bank (Q.P.S.C.) (“QNB”) to perform a limited assurance engagement relating to QNB’s Green Bond Allocation Report as at 31 July 2026 (the “Report”), which discloses the use of proceeds of the EUR 750 million Green Bond issued by QNB in September 2025 and the eligible green bond portfolio of USD 3,573 million allocated across the eligible green bond categories (the “Selected information”).

Use of report

This report is made to QNB, in accordance with the International Standard on Assurance Engagements 3000, Assurance Engagements Other than Audits or Reviews of Historical Financial Information, issued by the International Auditing and Assurance Standards Board (IAASB) (“ISAE 3000 (Revised)”) and our agreed terms of engagement. Our work has been undertaken so that we might state to QNB those matters we are required to state to them in this limited assurance report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than QNB for our work, for this report, or for the conclusion we have formed.

Our conclusion

Based on our work as described in this report, nothing has come to our attention that causes us to believe that the Selected Information, as set out on page seven of the Report has not been prepared, in all material respects, in accordance with the criteria set out in Appendix 1 – Eligible Activities for Sustainable Finance, section Green UoP and eligibility criteria of the QNB Sustainable Finance and Product Framework issued in 2023 (“Applicable Criteria”).

Respective responsibilities

QNB management is responsible for:

- Establishing the Applicable Criteria for preparing the Selected Information;
- Designing, implementing and maintaining internal processes and controls over the information that is relevant to the preparation of the Selected Information to ensure the information is free from material misstatement, whether due to fraud or error; and
- Measuring and reporting the Selected Information based on the Applicable Criteria.

Our responsibility is to express a conclusion on the Selected Information based on our procedures. We conducted our engagement in accordance with ISAE 3000 (Revised), in order to state whether anything had come to our attention that causes us to believe that the Selected Information has not been prepared, in all material respects, in accordance with the Applicable Criteria as defined within the Report.

Our procedures consisted primarily of:

- Performing enquiries with management to understand how the Applicable Criteria has been applied in the preparation of the Selected Information;
- Obtaining an understanding of the key systems, processes and controls for managing and reporting the Selected Information;
- Inspecting issuance documentation to confirm the total reported value of net proceeds;
- Inspecting minutes of the Sustainable Finance Committee to confirm the value of portfolio allocations during the period and that allocated projects were considered against the eligible categories and approved;
- Substantive testing to confirm that a sample of identified assets from the approved listing were funded in line with the approach set out in the Applicable Criteria;
- Obtaining a listing of assets to confirm this is consistent with the disclosure relating to proportion of total proceeds refinanced;
- For a sample of assets refinanced, inspecting operational records or other appropriate project documentation to confirm the amounts refinanced and that refinancing eligibility is in line with the Applicable Criteria; and
- Accumulating misstatements and control deficiencies identified and assessing whether material.

Independent limited assurance report (continued)

Criteria

The Applicable Criteria is published within the QNB Sustainable Finance and Product Framework issued in 2023, Appendix 1 – Eligible Activities for Sustainable Finance, section Green UoP and eligibility criteria.

The self-defined applicable criteria; the nature of the Selected Information; and absence of consistent external standards allow for different, but acceptable, measurement methodologies to be adopted which may result in variances between entities. The adopted measurement methodologies may also impact comparability of the Selected Information reported by different organisations and from year to year within an organisation as methodologies develop.

Inherent limitations

Our engagement provides limited assurance as defined in ISAE 3000 (Revised). The procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement and consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed.

Inherent limitations exist in all assurance engagements due to the selective enquiry of the information being examined. Therefore fraud, error or non-compliance may occur and not be detected. Our work does not involve testing the operating effectiveness of controls over the underlying data, nor have we sought to review systems and controls beyond those relevant to the Selected Information.

Our independence and competence

We complied with Deloitte's independence policies, which address and, in certain cases, exceed the requirements of the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants in their role as independent auditors, and in particular preclude us from taking financial, commercial, governance and ownership positions which might affect, or be perceived to affect, our independence and impartiality, and from any involvement in the preparation of the report.

We applied the International Standard on Quality Management ("ISQM") 1, Quality Management for Firms that Perform Audits or Reviews of Financial Statements, or Other Assurance or Related Services Engagements. Accordingly, we maintained a comprehensive system of quality management including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.
