Fund Manager Comment

Market environment

MENA equities, represented by the S&P Pan Arab Composite Large Midcap index gained 4.49% in the reporting month. Relative to global markets, Mena Equities outperformed the MSCI World by 2.68%. Global equities uptrend extended in to July supported by the strong performance from the mega cap stocks in the S&P 500 index. Both equity and bond markets are anticipating sooner rather than later interest rate cuts. Commodity complex represented by the Bloomberg Commodity Index was down 4.82%.

Portfolio performance

The fund underperformed its benchmark primarily due to other effects. Funds relative performance positively affected by overweight in Qatar, and UAE markets. Funds underweight in Kuwait and Morocco also contributed positively to relative performance. From a sectoral perspective, the biggest contributors to relative performance were Energy, Telecoms, Materials and Consumer Staples. While Industrial and Healthcare were negative contributors to relative performance.

Outlook

Mena markets relative performance to global markets pulled back from intermediate high in mid-2022. We anticipate that the pullback will make a higher lower and reverse back to the upward trajectory established. Commodity prices to benefit from the recovery of the global economy following structural changes in supply in the previous decade. Valuations remain undemanding while earnings growth expected at higher single digit.
