

Investment Objective

The objective of the Fund is to generate a constant stream of cash flows by investing into Reverse Convertibles (RCs), Structured Notes, derivatives and cash or cash equivalent instruments.

Investment Strategy

The Fund will invest primarily in Auto-Callable Reverse Convertible and other Structured Notes related to equity, currency, commodities and indexes, derivatives and cash or cash equivalent instruments [for liquidity purposes]. The investment process is designed to harvest markets' volatility and convert it into cash flows whilst controlling the idiosyncratic risk of any single name investment exposure and the related business sector via concentration limits.

NAV since inception and rolling 12 months total return

This is an actively managed fund that is not designed to track a benchmark. Past performance does not predict future returns. The value of investments and the income derived from investments will fluctuate and can go down as well as up. A loss of capital may occur.

Major Fund Allocation Changes

The fund ended August 2025 with total investments of \$91 million across 25 RCF notes together with approximately \$2.8 million in cash.

An early call provision was triggered due to the strong performance of four stocks within RCF 53 leading to an early redemption of \$4.0 million. The proceeds from the called note were subsequently reinvested into RCF 68, ensuring the funds remained fully invested.

The Fund also paid the third coupon for 2025, set at \$0.225 per unit, and the Board approved the fourth coupon payment for 2025 again set at \$0.225 per unit to be paid in November

The fund also recorded subscription and redemption activity during the month, resulting in a net outflow of \$1m.

General Considerations on the Stock Market

In August, the US equity reference index delivered a return of 3.5%, up from 2.3% in July. The volatility index remained stable at 15.4% by the month-end. Meanwhile, the average 12-month residual life of the US Treasury yield remained close to 4.0%. These factors had little to no material influence on the secondary market pricing of the individual RCs held within the fund.

Coupon Payments

Next Payment Date	6th November 2025
Total Coupons Paid Since Inception	\$ 1.925 per unit
7 th August 2025	\$ 0.225 per unit

<p>The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested. The information herein is for illustrative purposes only and reflects current market practices and is not intended to constitute legal, tax, accounting, or financial advice; investors should consult their own advisers on such matters. At all times prospective investors considering an investment in the Fund should carefully read the Private Placement Memorandum and the Terms & Conditions of the Subscription form. Investors are reminded that the past performance of any investment is not a guide to future returns. All performance figures are of fees. The Fund may incur further expenses (not included in the above Ongoing charge) as permitted by the Private Placement Memorandum.</p>			
Important Risk Considerations			
<p>■ Counterparty risk a party that the Portfolio transacts with may fail to meet its obligations which could cause losses. ■ Custodian risk insolvency, breaches of duty of care or misconduct of a custodian or sub-custodian responsible for the safekeeping of the Portfolio's assets can result in loss to the Portfolio. ■ Derivatives risk derivative instruments are highly sensitive to changes in the value of the underlying asset that they are based on. Certain derivatives may result in losses greater than the amount originally invested. ■ Exchange rate risk changes in exchange rates may reduce or increase the returns an investor might expect to receive independent of the performance of such assets. If applicable, investment techniques used to attempt to reduce the risk of currency movements (hedging), may not be effective. Hedging also involves additional risks associated with derivatives. ■ Liquidity risk the Portfolio may not always find another party willing to purchase an asset that the Portfolio wants to sell which could impact the Portfolio's ability to meet redemption requests on demand. ■ Market risk the value of assets in the Portfolio is typically dictated by a number of factors, including the confidence levels of the market in which they are traded. ■ Operational risk material losses to the Portfolio may arise as a result of human error, system and/or process failures, inadequate procedures or controls.</p>			
<p>Complete information on the risks of investing in the fund are set out in the fund's Private Placement Memorandum.</p>
